Apply outside the UK

As part of your application, you'll need to prove your identity. How you do this depends on where you're from and what type of passport you have.

You'll either:

- have your fingerprints and photograph taken at a [visa application centre](#)
- use the 'UK Immigration: ID Check' app to scan your identity document (you'll also create or sign into your UK Visas and Immigration account)

You'll be told what you need to do when you apply.

Once you've started your application, you can save your form and complete it later.

Confirm your identity

You will need a passport with a biometric chip.

Scan your passport and upload a photo of yourself

To confirm your identity, you will use the free UK Immigration: ID Check app to scan your passport with a biometric chip and upload a photo of yourself.

If you are applying for someone else, the applicant needs to confirm their identity - you can help them use the app.

If you cannot use the app to confirm your identity

You will need to go to a visa application centre after you apply instead. Visa application centres are not available in all countries.
